SUPREME COURT-Special. Team-Fee. 77.—Before
Jodge Francov.

Motion to discharge from arrest made pursuant to
the set to gunish fraudulent debtors. The warrant was allowed
the ground that the defendant was about to remove his property out of the jurisdiction of the Court, and to dispose of k
with intent to defraud creditors.

On a full review of the evidence in support of these averments, it is held by the Court to be insufficient to establish a
flaudulent intent. The defendant is, therefore, discharged from
greet.

Judgment of divorce.

Low et al. agt. Marcus.

Injunction granted.

bjunction granted.

Bitted States District Court-Fee. 27.—Before Judge Berrs.

Edward Abeel, tried on a charge of committing an account with a dangerous weapon, was acquitted.

The Grand Jury then presented infletments against Timethy Meriarty for appropriating mail bass; Charles Chandler and —Swift for assault with a dangerous weapon; Leonis Schuster, Lydis Ann Francis Bayard; Benjamin Moore and Benjamin Dutton; and Francis Bayard; Benjamin Moore and Benjamin Dutton; and Seraphine Feterzen, for making and uttering counterfeit seems.

Another indictment was also found against Seraphine Peter-ness for making and forging counterfeit com.

Te the first of tasse indictments Petersen pleaded guilty, and was remanded for sentence; to the second he pleaded "Not

With a fair amount of business this morning the tendency of prices at the Stock Board was downward. There was considerable cash stock thrown on the market, but the bears were not very free sellers on time. At the Second Board the market was firmer, and a portion of the decline was recovered, and after the Second Board sales were made in some cases at an improvement on closing prices at the Board. Panama was among the strongest stocks to-day. Erie, 57; Reading, 802; Central, 894; Ohio Life and Trust, 984; Toledo, 74 274; Southern, 75 275; Michigan Central, 95; Rock Island, 103; La Crosse, 74; Milwaukee and Mississippi, 70; Cincinnati and Indianapolis, 67, &c., all showing but little change from yesterday afternoon. The decline this morning was probably the result of the increased activity of money yesterday and to-day, but after I o'clock the market was freely supplied with capital, and the demand was moderate. Consequently the Second Board exhibited more firmness. The advance yesterday in Illinois Central Bonds was not sustained, the quotation receding to 98%. Other Bonds were steady but quiet. State Stocks are dull and rather heavy.

The Exchange market continues steady, with few

transactions. Freights are rather firmer. The engagements t Liverpool are 2,900 bbis. Flour at 1s. 6d. @1s. 7d., ,000 bush. Grain at 41 251d, 300 bales Cotton at -32 23-16d., 300 bbls. Lard at 17s. 6d., 500 boxes Ba-at ic. A vessel back from Cardenas with Sugar at 42ic., and Molasses at \$3. A brig from Havana to New-York for the round sum of \$1,600, port charges paid. Two ships from Cuba to New-York, about 650 turs, on private terms. Two vessels from Newbern to New-York with Rosin at 45c., and Spirits at 65c.

The business of the Sub-Treasury was: Receipts, \$175,555 10; payments, \$271,607 31; balance, \$15, 318,766 23. Included in the payments to-day were about \$100,000 of drafts drawn in favor of Mrs. Receide. It will be remembered that she has been recently awarded by Congress some \$300,000 due her late husband.

Money among the stockhouses was in good demand to-day, but the supply is better, and we hear fer or no complaints from borrowers. Some of the large houses here had considerable balances over. The activity of yesterday was caused by calling in loans banks, which had been beaten at the Clearing House.

In the Discount Houses there is a good demand for

mercaptile paper and the supply is rather decreasing. The business of the Clearing-House was \$23,396,000. It is stated that Meesrs. Claffin, Mellen & Co. have purchased the Carlton-House property for \$257,000. The lot is 60 by 175 feet. The property was recently

old for \$200,000. The Illinois has arrived from Aspinwall with 77 boxes of treasure, but the amount of gold we were un-able to ascertain after due inquiries at the ship. The Sonora brought down to Panama \$1,700 000, and the smount brought to this city by the Illinois is about \$1,200,000. The advices from California are rather more favorable than those by the last steamer. Trade had somewhat revived, and the receipte of gold at San Francisco had increased about 26 è cent. The miners were actively employed as the weather had become fine. California State Stock was quoted nominal at 50.

were actively employed as the weatner had become fine. California State Stock was quoted nominal at 50. The Shapping List says:

"The leading topic of interest in financial affairs, during the past fortnight, has been the mysterious disappearance of the \$124,000, and, by the State Treasurer, to have been set apart by him for the payment of the coming July dividends upon the State debt in New-York. The subject has been so thoroughly discussed in the public journals, that it is needless for us to enter upon the subject at length in this place. We may state, however, that it is the general opinion that the money is irrecoverably lost to the State, and that the July interest upon the State debt will probably not be met in New-York, as the present Legislature will find other uses for the remaining funds in the Treasury, and whatever may be received prior to the adjournment of that angust body.

"There has been an increase of fully 20 P cent in the amount of Gold Dust carning down from the mines during the past over the preceding fortnight, and the warm, thawing weather which existed through the latter part of January, doubtiess gave the miners an abundance of water to work with. We shall from this out have a large yield of the precious metal, and hope the long to have the pleasure of noting a cressation of the present stringent state of money matters with those engaged in business.

"The bankers have advanced the rate for sight ex-

tant transactions; \$2,000 Stockton 10 \$\displays cents were sold at 90 a lew days since."

There appears to be some political feeling mixed up with the question of the \$124,000 alluded to above, and it will be well to receive the statement of The

Shipping List with some grains of allowence. Mesers. Atwood & Co., will pay the interest on the bends of Knox County, Ohio, issued to the Mount Vernon and Pittsburgh Railroad Co., due 1st March.

The Goodyear India Rubber Glove Company has declared a dividend of 8 & cent, payable 2d March.

The difficulties which have so long attended the The difficulties which have so long attended the transmission of Goods from the manufactories, as well the shipments of purchasers from this city, have now almost disappeared. There is no very marked change, however, in the aspect of the domestic market, though an increased activity may be looked for next week. In Cotton Goods generally we notice an increased firmness of holders, though prices are nominated the same with alloth expensions. Printing Claths nally the same, with elight exceptions. Printing Cloths are firm. Brown Sheetings and Shirtings are in light stock and good demand. Blesched Sheetings and Shirtings are held in some cases at a small advance, though buyers at present hardly meet the expections of manufacturers. Ticks and Stripes are sold up close at manufacturers. Figure and Salves are any cover, 94c. for brown, 94c. for bleached, 104c. for blue Denims are steady. Osnaburghe in fair demand and light stock. There is an excellent trade doing in printed garments of all kinds. The most popular styles of standard prints are sold in advance to a great extent. Sprague's, Richmond's, in advance to a great extent. Sprague's, Richmond's, Al'en's and Dunnel's Prints are moving off very freely at 10 & 10 \(\) at 10 \(\) at 10 the other printers are doing a good business, and the companies generally are improving in the quality as well as increasing the quantity of their productions. The average weekly production of all the Calleo print works in the United States is estimated at 110,000 pieces. Lawns are now in fine assortment, and desirable styles are selling readily at 9c. for tenhundred, 11c. for twelve-hundred, 13 & 14c. for four-ten-hundred, ten-hundred Lawns are going off rapidly. tes n-hundred; ten-hundred Lawns are going off rapidly. Girghams are still in very moderate supply at 10; 20: chester, Pacific and Hamilton Companies is very rich; the styles are generally tasteful and the colorings ex-cellent; prices steady at 18 2 20c. In fancy Cassi-meres there is an entire absence of animation. Trade in these fabrics is decidedly backward; holders, however, are firm, as the price of material forbids recession. Cotton-warp Cloths bring satisfactory prices, as the stock is not large. Low-priced Satinets are in fair demand. For Tweeds there is little inquiry. Jeans

are more active.

Importers are doing a somewhat less active business than last week. Western and Southern buyers have nearly completed their purchases for the present, and the city jobbers do not seem eager to enter the market. They will not probably gain much by waiting, as the stock of goods of most descriptions is not greater than the wants of the trade will require. Many of the jobbers have imported some stock for their early trade, intending to fill out their assortments from the commission houses, as goods are needed. Silks are held very firmly and foreign advices tend constantly to increase the confidence of holders. Raw silk has advanced in London during the last week 1/. Black silks at 92c. are scarce. The finer grades of cloths are rather flat at present. The importation of these goods has been fully up to the wants of the market, to say the least. In linens there is not a very active trade. There is more doing in Scotch than in Irish licens generally. Importers are looking for an excellent and remunerative trade in April. The effect of the early importations has been manifest in the giving of longer credits, by a month, at least, in many cases. Payments come in well from the South, but there has been some disappointment in regard to receipts from the

North-west.

The bill for the extension of the Morris and Essex Railroad to the Hudson River, which has passed the New-Jersey Assembly, was reported in the Senate on

Wednesday, with amendments.

The supplement to the act to authorize the New-York and Eric Railroad to hold lands in New-Jersey, passed the Senate of that State on Wednesday.

cluded in the February returns. Its report for November, the result of which is included in the above figures under the head of that month, were:

freely met, and rates rule at 9 a 10 P cent discount for first-class bills, and 12 a 15 \$\psi\$ cent discount for bills of

long time and railroad acceptances.

At Boston money is in active demand and rates for temporary loans are quoted higher. The Banks are discounting very sparingly, and the street is the only

The annexed article in regard to the Metropolitan Bank and the uncurrent money system introduced by it is from The Independent, and is written by a Director in that Bank, and one who took the initiative in its formation, and to whom is due much of the credit of the reform in uncurrent money which has been estab-

listed by the Metropolitan:

"The healthy system of bank-note circulation and redemption, alluded to in our last, was not achieved without energetic and varied efforts on the part of dealers in uncourrent money and banks in their interests, to prevent so desirable a consumption; nor without a bold attempt on the part of one city bank in aiding to introduce a currency still more depreciated than the worst of our own State. We state this fact as a matter of history.

introduce a currency still more depreciated than the worst of our own State. We state this fact as a matter of history.

"When the banks of mere circulation in this State had become unprofitable, and felt constrained, through the operations of the Metropolitan Bank to wind up, the managers of three banks, not disheartened by unsuccessful attempts at home, seized the opportunity afforded them by the general banking laws of other States, especially those of Indiana passed over the Governor's veto), to create a new litter of the species of bank called "Wild Cat." Nominally they were of foreign origin, but in reality their hiding places were in the basements of Wall street.

"This movement would have had not even a temporary success, had not one of the largest Wall street banks promoted the plan, by agreeing to receive the bills of Indiana free banks, at 1 & cent discount, retaining, it was understood 1 & cent far its services—thereby sustaining and indorsing an enterprise fraught with incalculable mischief.

"As soon as this was known, sagacious business men forcease the disastrous consequences which must ensure if the community were flooded with this greatly deprecisted currency. Several merchants and others, therefore, immediately canced representations to be made to the Legislature, which excited the fears of the Bank Committees of the Secate and Assembly, and enlightened them as to the injurious results of the project. Already two millions of the Indiana money had been created and issued, and a larger amount was in course of preparation. The remedy, therefore, to be effectual, must be immediate.

"The Legislature, seeing the secessity of the case,

and whatever may be received prior to the adjournment of that august body.

"There has been an increase of fully 20 \$\textit{P}\$ cent in the amount of Gold Dust coming down from the mines during the past over the preceding fortnight, and the warm, thawing weather which existed through the latter part of January, doubtless gave the miners an abundance of water to work with. We shall from this out have a large yield of the precious metal, and hope fre long to have the pieceure of neding a cessation of the precent stringent state of money metters with those engaged in business.

"The bankers have advanced the rate for sight exchange on New York to 31 \$\tilde{\text{cent}}\$ cent premium, on account, as they state, of finding that the old rate of 3 \$\tilde{\text{cent}}\$ cent did not more than reimburate them for the cost; of placing funds there to to draw bills against.

"Rates of interest remain without any notable changes; money is as shoulant as ever upon good security.

"Bare are more plentiful for this steamer, and we know of some lists under 900 being sold at par. Mexican dollars are plenty and in little demand; some are also plenty; a sale of 1,000 Mexicans was made yesterday at 4 \$\tilde{\text{cent}}\$ cent premium upon \$\tilde{\text{them}}\$ (in the p

took them up at a less discount, and again sold them, as before, on the best terms be could obtain, to parties who paid them away to perform the same round of traffic; pher by any chance to be redeemed at par by any body, but filling the city with bank notes which could be sold only at a discount three times as large as the recognized by law for our own bills.

"Had this design prevailed, the endeavors of the Metropolitan Bank, to free the city from degreeisted morey, would have been to a great extent foustrated; and our own banks would have lost the circulation they are justly entitled to.

"The mutual dependence and support which exists between the Metropolitan Bank and the country banks of this State, may be seen by a glance at their business relations. The country banks deposit their uncurrent money, as before sta'ed—New York State at i, and New England at 1-10 of 1 the cent discount. Their collections are made in New-York City and vicinity free of charge, also on Boston and Philadelphia, taking only five days' time before crediting the amount. They get 4 the cent interest on their whole balance when it amounts to \$5,000, but nothing when it falls below that, till it again reaches the minimum amount; and these terms are uniform.

"They also receive \(\frac{1}{2} \text{ free end discount.} \) Beside which, sometof the country banks are constantly requiring and receiving discounts of their bills receivable. It would probably be within bounds to say that the accommodation in this way averages \$750,000, while unavoidable overdrafts equal to half that amount. The latter, by the rules of the bank, are not permitted, but still occur, and are, at times, exceedingly burdensem; for the bills of country banks always flow in for redemption most rapidly when money is in greatest demand; and to protect their credit— to honor their bills—the Metropolitan often has to advance funds, when their individual depositors (who get no interest on their accounts), are most elamorous for discounts, and show indisputable claims to a

Bank system; and there be shaved at rates varying with the state of the money market, and the necessities of the reliers.

"On the other hand, many of the country banks require no discount, and never violate the rule respecting over drafts: keeping a sufficient amount to their credit, not only to redeem their bills and accommodate their customers with exchange, but also to secure a good constomer, when a discount will do it. The credit balances, therefore, always equal, and generally exceed, he aggregate of over-drafts and discounts to country banks—leaving the capital stock to be applied to the redemption of uncurrent money and discounts to individual depositors.

"Thus it would appear, that the country banks sipply the means for their discounts and over-drafts at the Metropolitan Bank—the latter being the medium through which the funds are distributed in such a manner as to protect the credit of all, and redeem their circulating notes; which latter, however, is not accomplished without the use of a considerable capital, which will more clearly appear hereafter."

From The Cincinnati Price Current, Feb. 25.

The returns of the hogs slaughtered during the season are nearly complete, and sufficiently so for all practical purposes, as those from the few places yet to be heard from will not essentially change the result:
